BRONZE FLEXIBLE IMPELLER PEDESTAL PUMP 51520 SERIES

PUMP with 3/8" BSP PORTS

- * Constructed from marine quality bronze and stainless steel
- * Self-prime from dry up to 1.5m
- * Easy to service and maintain
- * Will tolerate abrasive wear
- Handles hard and soft solids without clogging
- * Can pump in either direction
- * Will not airlock

DOC536/11

51520 Self Priming Flexible Impeller Pump

03/04

51520 Series

Self Priming Flexible Impeller Pump

Features

Body: Brass **Impeller:** Neoprene

Seal: Carbon/Ceramic Mechanical

Shaft: Stainless Steel
Bearings: Sealed Ball Bearings
Ports: 3/8" BSP or 3/8" NPT

Weight: 0.67kg (1.5lb)

Variations Available

Model Description

51520-2001 3/8" BSP internal ports 51520-9001 3/8" NPT internal ports

Typical Applications

Marine:

Engine Cooling, Bilge Pumping, Water Circulation **Industrial:**

Circulating and Transferring, Velocity Mixing

Pumping Water for Stock, Liquid Ballast Transfer

Installation

- 1. Pump may be mounted in any position. Intake and discharge ports are determined by the shaft rotation. Ensure pipe fittings are air-tight or pump will not prime.
- 2. Pump can be belt or direct driven.

Do not press pulley or coupling on shaft without supporting the other end, bearing and/or seal damage will occur. Ensure belt is of correct tension, ensure drive shafts and pump shaft are aligned before tightening coupling.

- 3. Pump can be operated upto 3600 rpm and up to 22 psi (1.5 bar) (see performance curve)
- 4. Pump will prime at low or high speeds, for a vertical lift of 10 feet (3 m), a minimum speed of 1000 rpm is required.
- DO NOT RUN DRY for more than 30 seconds, impeller damage will occur.
- 6. Operating temperature, 45°F to 180°F (7°C to 82°C).
- 7. Freezing conditions, drain pump by loosening end cover screws.

Service Instruction

Disassembly:

- 1. Remove end cover screws, end cover and O-ring.
- 2. Remove impeller.
- 3. Remove dust shield and retaining ring.
- 4. Press out shaft/bearing assembly.
- 5. Press out mechanical seal.

Assembly:

- 1. Press stationary part of mechanical seal into body.
- 2. Press rotary part of mechanical seal onto shaft.
- 3. Press shaft into body, do not allow shaft to touch seal face.
- 4. Fit retaining ring and dust shield.
- Lightly smear impeller bore with grease and fit impeller.
- 6. Fit o-ring, end cover, and secure end cover screws.

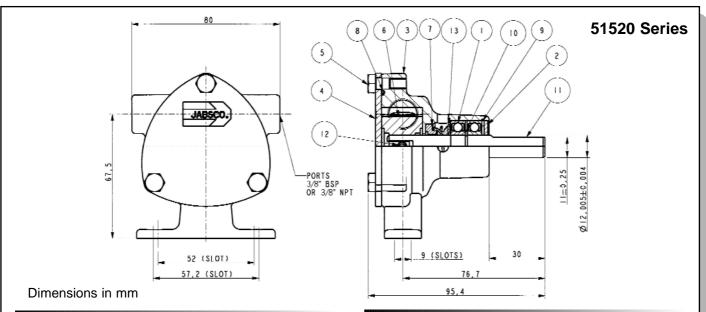

DO NOT pump petroleum or fluids with a flashpoint below 30°C (86°F)

51520 Self Priming Flexible Impeller Pump

Parts List

Key	Description	Part Number
A	Impeller Kit (Contains Impeller (6), O-Ring (8))	653-0001
В	End Cover Kit (Contains End Cover (4), Screws (5), O-Ring (8))	SK501-0000
С	Shaft Kit (Contains Shaft (11), Bearings (1), Retaining Rings (10 & 9), Dust Shield (2))	SK502-0000
D	Service Kit (Contains Impeller (6), O-Ring (8), Mechanical Seal (7), End Cover Screws (5))	SK503-0000
E	Seal Kit (Contains Mechanical Seal (7), O-Ring (8), Support Washer (13))	SK504-0000

Performance

Note: Performance shown is for a new pump, pumping water at 20°C, performance may vary by up to 15%. Consult factory for performance of alternative impeller compounds.
