Disassembly

- 1. Remove the endcover and the gasket.
- 2. Pull out the impeller using two screw drivers or other suitable implements.
- 3. Remove the lip seal.
- 4. Remove the shaft with ball bearings by pressing on the shaft end from the impeller side.
- Remove the ball bearings. Do not press the ball bearings over the sealing surface.
- 6. Remove the o-ring from the shaft.

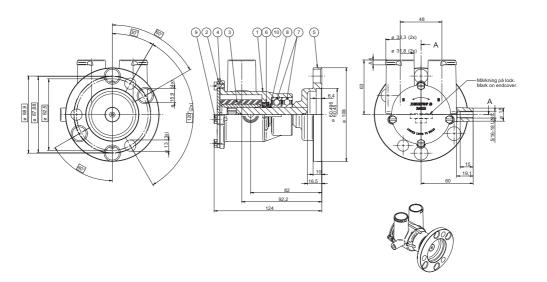

Assembly

- Mount the ball bearings on the shaft. Do not press the ball bearings over the sealing surface.
- 2. Mount the o-ring on the shaft.
- 3. Press the shaft with ball bearings into the body.
- 4. Mount the lip seal (spring towards the impeller).
- 5. Lubricate the impeller with JP Impeller Lubricant and fit it with a rotating movement in the intended direction of rotation.
- 6. Fit the gasket before mounting the endcover.

Waste handling material recycling

At the products end of life, please dispose of the product according to applicable law. Where applicable, please disassemble the product and recycle the parts material.
