PUMP CONSTRUCTION & SERVICING:

March "Orbital" Magnetic Drive Pumps eliminate the conventional shaft seals found in most pumps. Hence, there is no rotating shaft or seal to wear and allow the liquid being pumped to leak out. The only seal in the pump is a stationary "O" ring seal between the Cover and the Rear Housing. The pump can be serviced with the use of a screwdriver. The only moving part other than the motor is the Impeller Assembly, which rotates on a stationary shaft and up against a thrust washer. These are the only parts that might wear, and may require replacement. See the Repair Parts list for replacement parts.

OPERATION:

Pumps are not self priming and will not produce a suction lift and must be installed with a positive flooded suction. The pump should not run dry for long periods of time, as we rely on the liquid being pumped to lubricate the Impeller Assembly spinning on the stationary shaft. Teflon Filled and Carbon bushings are available upon special order. Contact the factory for special applications. A trimmed impeller may be necessary when pumping a liquid with a specific gravity or viscosity greater than water as well in cases of high liquid temperature.

ELECTRICAL:

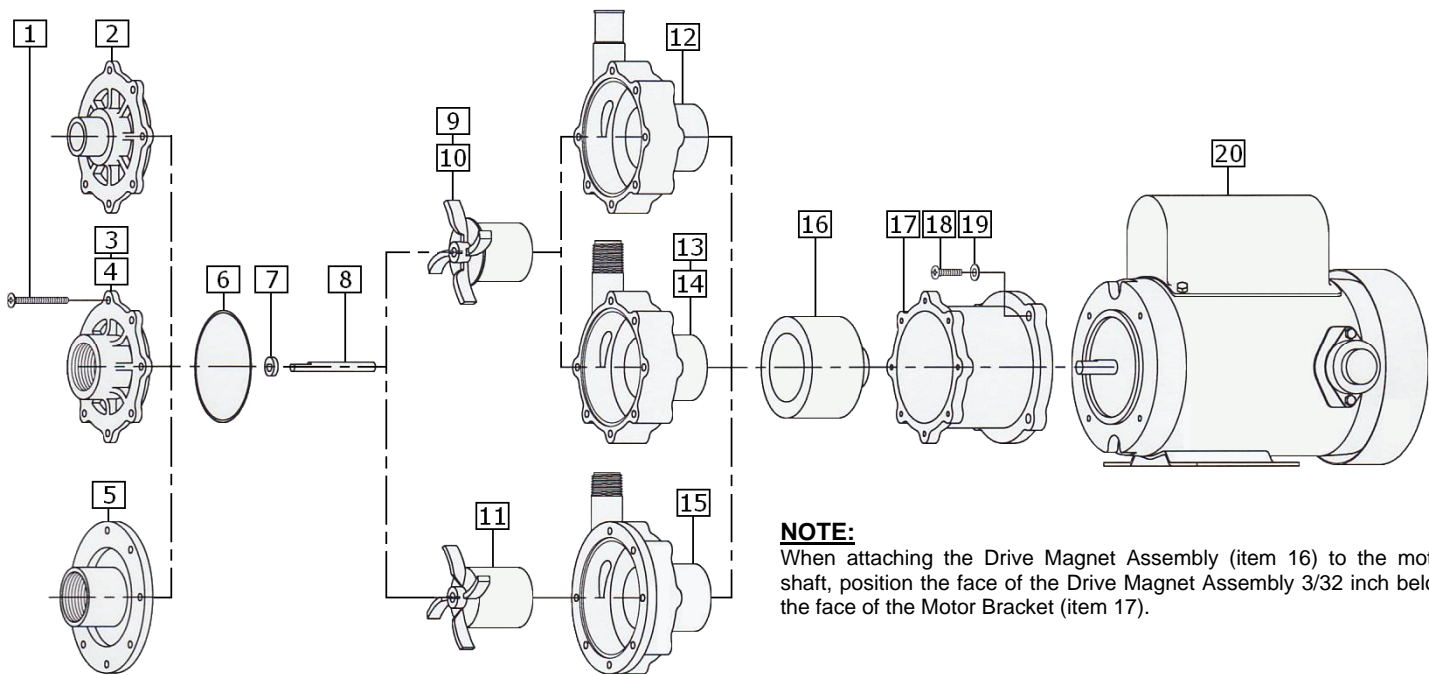

The standard pump has a 115/230 Volt, 50/60Hz, 1 Phase, A.C. Motor. The motor is totally enclosed with an external fan. A junction box is located on the side of the motor with instructions for the proper electrical hook-up. The motor is thermally overload protected and designed for continuous running. Explosion proof and special voltage motors are available upon special order.

MODEL ABBREVIATIONS:

TE = Totally Enclosed Fan Cooled Motor, MD = Magnetic Drive
 5C/5K/5S = Threaded Inlet/Outlet, 5A = Smooth Inlet/Outlet
 S = Stainless, K = Kynar, C/A = Polypropylene.

NOTE: Contact Factory for other materials and/or parts not listed.

Legend: S = Standard, O = Optional

MATERIALS IN CONTACT WITH SOLUTION:

For TE-5C-MD & TE-5A-MD: Polypropylene, Viton, Ceramic

For TE-5K-MD: Kynar/Carbon Filled, Viton, Ceramic

For TE-5S-MD: 316 Stainless Steel, Viton, Ceramic, Carbon

NOTES:

All specifications & data are based on pumping water and are intended for use as a guideline only. Ratings may vary depending on the current motor being used.

LIMITED WARRANTY:

March pumps are guaranteed only against defects in workmanship or materials for a period of one year from date of manufacture pumping water. On all other solutions, contact the factory for application assistance. March Pump Application Worksheet 0750-0130-1000 is available for additional warranty information.
