

# JABSCO®

## Model 3380-0001

MODEL: 3380-0001

### Self-Priming Pumps

#### FEATURES

Body:	Bronze
Impeller:	Jabsco Neoprene Compound
Shaft:	316 Stainless Steel
Shaft Seal:	Lip Type
Ports:	1/2" NPT
Weight:	Approx. Shipping Wght. 5½ lbs

#### APPLICATION:

Marine Engine Cooling

#### FOR ENGINE MODELS:

CHRIS CRAFT - K Series (95 to 120 HP)  
HERCULES - QX  
KERMATH - Sea Prince  
OSCO - Hercules Diesel 470 (and others)  
PALMER - PH75 - PH125  
UNIVERSAL - Explorer 6 - Model OK  
Master 6 - Model OL

Model 3380-0001

### DIMENSIONAL DRAWING

### INSTALLATION INSTRUCTIONS

Engage shaft with drive tang, make sure flange seats squarely on mounting surface and bolt to engine. Connect inlet and outlet fittings using pipe compound to seal threads.

### OPERATING INSTRUCTIONS

Pump will self prime at low or high speeds. Make sure scoop and inlet line are clear and all connections air tight. Do not run pump dry for more than 30 seconds. Lack of water flow may damage impeller. To drain pump, loosen end cover screws.

**SERVICE INSTRUCTIONS**

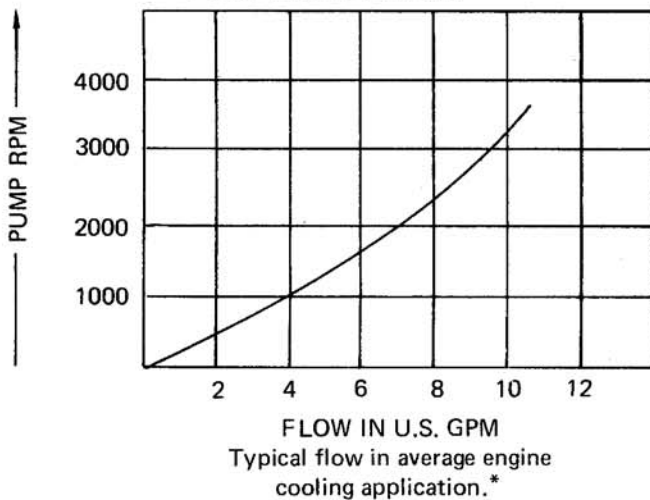

**IMPELLER REPLACEMENT:** Remove end cover and gasket. Pull impeller out by grasping hub with pliers. Replace impeller, gasket and end cover. A light coating of grease in impeller bore will aid priming on dry start up. (Use correct Jabsco gasket; a thicker or thinner gasket may cause impeller damage.) Standard gasket is 0.010" thick.

**MAJOR REPAIR:** Remove pump from engine to replace seal, bearings or shaft. To disassemble pump, remove end cover, gasket and impeller as outlined above. Press on impeller end of shaft to remove shaft and bearing assembly. Remove cam and wearplate assembly. Use screw driver to pry bearing seal out of bearing bore. Press shaft seal out towards impeller bore. Replace all worn parts. When installing coupling, support splined end of shaft. Press bearing seal in bearing bore with lip towards bearing. Press shaft and bearing assembly into bearing bore. Press adaptor ring into body. Install slinger on shaft. Install O-ring in seal bore. Press seal in seal cavity with lip facing toward impeller bore. Apply a small amount of sealant to top of cam and cam screw threads. Install wearplate and cam assembly. (Be sure cam is flush with end cover surface.) Secure with screw. Lubricate impeller bore; install impeller. Lubricate impeller face, install gasket and end cover and secure with screws.

KEY	DESCRIPTION	PART NO.	QTY.
1	Screws (End Cover)	91002-0020	6
2	End Cover	11830-0000	1
3*	Gasket	5212-0000	1
4*	Impeller	1210-0001	1
5	Cam Wearplate Assembly	5211-0000	1
