

Hydro Air Switch

Ultra reliable bilge switch, which will automatically operate bilge pumps once water level reaches 2 1/4" (55mm). As water rises in the bilge, air pressure in the bell and tube increases, operating a diaphragm switch in the switch unit. All electrical components are clear of the water and no sensitive electronics are used.

- Styling compliments modern interiors.
- Automatic operation of bilge pumps or audible and visual high water level alarms.
